

Sona — Product Screens

Reference screens for design & experience conversations

Prepared	13 June 2026
Build	Sona MVP · Flutter web · live API
Data	Synthetic sample personas — no real patient data

Six core screens spanning the clinician workflow (caseload → consult prep → triage → reports) and the parent experience (portal summary). Auth, onboarding and empty states are intentionally omitted.

Caseload dashboard

The clinician’s home: every active case with its stage, plus day-level KPIs and “up next”. Synthetic caseload — Aria (speech sounds), Jaden (stutter), Mia (social communication), Theo (feeding).

4 case(s) loaded

AI-drafted consult prep brief

Auto-generated from the parent’s intake before the session: primary concern, flagged difficulties, suggested probe areas, red-flag check and clinical references — all clinician-reviewed. Persona: Aria M., 4 yo.

Consult prep · Aria M.

Consult ready · prep brief drafted from this morning's intake

Client

Aria M.

Parent: Anna M. · anna.m@example.com

Concern

Hard to understand at nursery — drops final consonants and some sounds replaced. Some attention drift in 1:1 play.

Difficulties flagged

Speech sounds

Staying on task

Red flags

No red flags from intake — confirm in conversation

References

RCSLT — Speech sound disorder

Mark consult complete

Triage

Suggested probe areas

AI-drafted · clinician-reviewed

Confirm primary concern with parent (Aria M.): "Hard to understand at nursery — drops final consonants and some sounds replaced. Some attention drift in 1:1 play."

Review age band (see date of birth in intake) and red flags from intake

EHCP / SEN plan status if indicated in intake

Home

Parent summary

Case: prep_ready

Triage & session plan

The clinician confirms the triage outcome and edits an AI-drafted session plan, then publishes a parent-friendly summary. No clinical detail leaves the portal. Persona: Aria M.

☒ Formal assessment – speech sounds (DEAP)

☒ Parent strategies – carry-over at home

☒ Review in 4 weeks

Next step

Publish a parent-friendly summary to the secure portal.
No clinical detail in email.

Publish parent summary

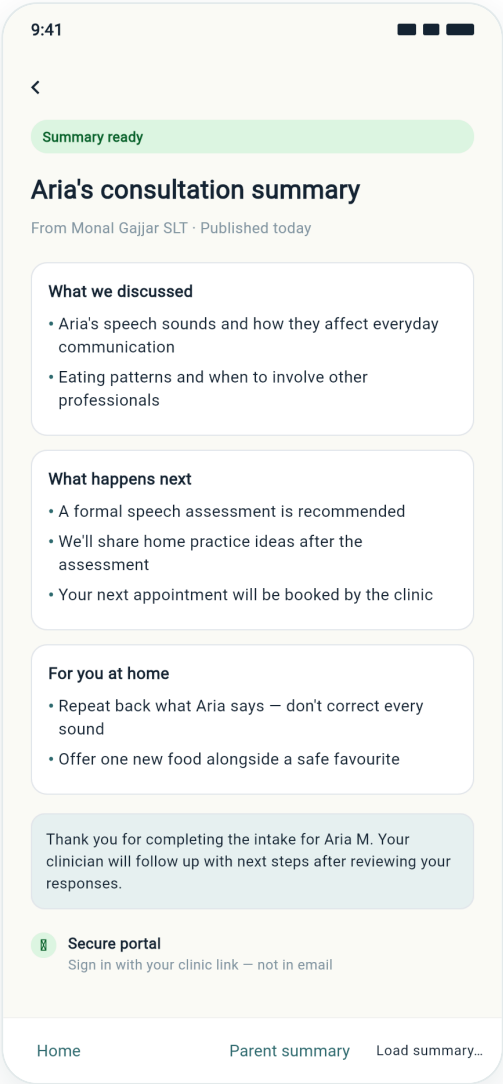

Home

Parent summary

Case: prep_ready

Parent portal summary

The parent’s mobile view after the consult: plain-language “what we discussed”, “what happens next”, and at-home strategies — delivered to a secure portal, not email. Persona: Aria M.

Client list & filters

The full caseload with search and stage filters (intake pending → summary sent). Each row shows the parent contact and last activity. Synthetic personas.
